Subject Index to Volume 22

A

Anesthesia dolorosa 132

B

Biochemistry and neurotoxicology of guanidino compounds: history and recent advances 85
Book Reviews
Advances in behavioral economics, volume 1 162
A fistful of ego 38
Biobehavioral bases of coronary heart disease 31
Emotional stress (emotsionalen stres) 37
Introduction to the physiopathology of neurotic states 158
Is it worth dying for? A self-assessment program to make stress work for you, not against you 31
Neurophysiologic mechanisms of thinking; the reflection of thinking activity in neuronal impulsation 38
Principles of neural science 159
Psychophysiological risk factors of cardiovascular diseases, parts 1 and 2 31
Response times: their role in inferring elementary mental organization 160
Type a behavior and your heart 31
Brainstem "mini-discharge" syndrome (anesthesia dolorosa) 132

C

CNV shape and resolution time, motor response information 1
Conditioning, attention, and the CS—US interval: a theoretical statement of relations 16
CS—US interval and conditioning and attention: a theoretical statement of relations 16

F

Freud, compared with Gantt and Pavlov 153

G

Gantt, W. Horsley, publications of 52
Gantt, Pavlov and Freud: a comparison 153
Gantt, through the camera eye 157
Guanidino compounds, biochemistry and neurotoxicology of 85

I

Incubation of conditional suppression is an associatively based phenomenon 118

L

Letter to the Editor: Mesothalamic brain stimulation for movement disorders (functional ablation of mini-discharge circuits) 40

M

Motor response information influence on CNV shape and resolution time 1

P

Pavlov as a psychologist: a reappraisal 103
Pavlov, compared with Gantt and Freud 153
Pavlov's conceptualization of unconditional reflexes or instincts within the framework of the theory of higher nervous activity 123
Pavlovian Society
Future meetings 45, 74
1986 Meeting Program 41
Reports form the historian of 75
Pavlovian studies on the effects of starvation: a contribution to the history of neurodietetics 95
Polygraphy evaluation from a psychophysiological perspective 145

S

Sex differences, activation level, and bilateral electrodermal activity 113
Smoking, personality, and imagery preference in relation to spontaneous bilateral electrodermal activity 7
Startle responding and context conditioning: Naloxone® pretreatment and stimulus intensity 47
Starvation, Pavlovian studies on the effects of 95

T

Theory of higher nervous activity, Pavlov's conceptualization of unconditional reflexes within the framework of 123
